

# General Technical Rider

For Large Room Formats, Ballrooms or Auditoriums the Client shall provide the following:

1. **Stage:** A minimum stage size of 12' x 18'. The performance or stage area must be clear of obstructions such as furniture, cables, speakers or band equipment. The surface must be smooth, level, dry and clear of debris such as confetti, balloons.
2. **Stairs:** For stages over 12" high, please provide stairs on the front of the stage for easy access to audience.
3. **Sound:** The sound system must work for music and voice audio. Most ballroom systems that are built into ceilings are not adequate and will need an external speaker system with microphones and CD player. We will provide the music.
4. **Lighting:** Stage wash. A spotlight adds to the theatrics and is recommended but not mandatory.
5. **Seating:** The audience should be seated no more than 7' from the stage. If dancing is scheduled after the performance, it is highly recommended the dance floor be placed on the opposite side of the room.
6. **Room Access:** For our larger shows we like to have access to the room 90 minutes before the audience arrives to review lighting, sound system checks and general setup.
7. **Dressing Room:** A private, secure room close to the performance area with a table and chairs.
8. **Hospitality:** Four bottles of water. One warm meal.
9. **Billing:** Corporate Entertainer and Magician, Andrew Woo.
10. **Recordings:** It is strictly prohibited to video tape the performance without written approval by Andrew Woo.
